*Welcome in peace...
more welcome in war work*

MANY OF US like to go to the store and see what's new. Well, you that supply real power to the whole lot of us, we'd like to see what's new in your investment in their plants. That's the reason we're here. Again, for Coca-Cola, we're not really changing, but it's one of those little things that brightens a busy day.

You might think it strange that workers have such a serious job for a soft drink. But Coca-Cola has something all its own in production. Made with a fresh air, it has taste that always pleases. And more than just quenching thirst, it brings a happy after-cure of complete refreshment. Nothing so fresh as a trying, around Coca-Cola.

Leaves when plant managers have made to use a machine that the both, suitable for an overall Coca-Cola means a lot in such a new plant. It is including several in the country, all of things... a way to both to include to go with an strong, from work.

Consulting & 2000-2001 and around 2000-2001
 Department of the Navy is also an important stakeholder.

Blueprint for Good Citizenship

SITTING in the school classrooms of today is the generation which in the aftermath of the most barbaric conflict in human history, will inherit the task of joining the world together again and making it more just.

The child of eleven or ten years' age, will have a vote. How he uses that vote, how he shapes his life will determine the shape of the country's future.

The responsibility of the schoolteacher of the present, of the churches, is greater today than at any time in our past.

Above all else, it is the responsibility of leading Charities

That is emphasized by wartime conditions, the alarming increase in juvenile delinquency. It is emphasized by the obvious fact that there can be no "better world" without man's flesh as man being purified.

See a Thought, and you reap an Act;
See an Act, and you reap a Habit;
See a Habit, and you reap a Character;
See a Character, and you reap a Destiny.

From time to time we have made the point that the educational systems of Canada are not sufficiently tuned to the call of Aboriginal Teachers and pluralistic authorities have been among the first to recognize that fact.

Now comes a report worth serious study. It is a report of the Survey Committee appointed by the Canada and Newfoundland Education Association to report on the dual educational needs of the Inuit.

Committee members are W. F. Fernald, Director of Protestant Education for the Province of Quebec (Chairman), Father Plamondon, Director of Education for New Brunswick, R. D. Wynn, Deputy Minister of Education for Quebec, G. F. Rogers, Deputy Minister of Education for Ontario, G. F. McNulty, Deputy Minister of Education for Alberta, T. D. Atkinson, secretary.

Reporting that the investigation showed that the "general department of education is by no means complacent or stationary. They have indeed taken the lead in deterring weaknesses in the schools and in moving toward improvements," the committee only shows the following objectives for a democratic school:

- 1 The principle of morality should be firmly established
- 2 Physical well being should be the main concern of home, school and State
- 3 Worthy citizenship should be inculcated and good moral customs should have large place in the school day.

⁸ The attitude must be thoroughly implanted that all must work and that good citizenship is necessary at all times. The emphasis that, in after school days, the right to work must be secured and that the educational offerings will train for employment.

2 People should be taught to own their selves to the extent of their abilities and to be prepared to accept their full responsibilities as citizens both now and in the future.

Among the report's 40 recommendations are these:

An extensive survey should be made in order to ascertain the areas and subjects in which health counseling are considered. Healthy children are positive events; mild ones are failures. Proper health services should be provided.

Larger units of administration should be set up in order to give greater opportunities for education to children in rural communities. An equivalent first should be established to aid the next level school districts to offer better educational facilities.

The school leaving age for full time attendance should be placed at sixteen years, and part time attendance should be removed of pupils until the age of eighteen.

Teachers' salaries should be increased until the median salary throughout the Dominican Republic is \$2,115. (Average earnings of workers in all Dominican industries in 1948 were \$2,115.) Teaching is so important an occupation for the betterment of the country that only the most capable and most promising young people should be attracted to the profession, and kept in it throughout their lives.

Restrooms, communication facilities are made in the matter of curricula. Compounds like schools for rural children, additional gender schools in centers where higher education facilities are not available, provision of transportation facilities or scholarship assistance for people living at a distance from schools, special educational facilities for retarded men and women to enable them to make a living.

The cost of the program is estimated at \$200,000.

That is one twenty-fourth of the amount of money Canada will spend on the war in the current fiscal year.

It may not all be available at once. But ultimately, as an investment in the spiritual of this country, it would bring returns beyond calculation.

The Mother of Parliaments

A Circle Thanks Star & Shining Her Age

THE EIGHTH AVENUE runs from the ocean, of course, to a kind of big, noisy, busy city. Any place that runs past a beach is bound to be a good place to live. The Eighth Avenue is a pleasant surprise, and with its many shops, galleries, and restaurants, it is a very good place to live. The Eighth Avenue is a lot like the beach, with its many shops and galleries, and its many restaurants. The Eighth Avenue is a lot like the beach, with its many shops and galleries, and its many restaurants. The Eighth Avenue is a lot like the beach, with its many shops and galleries, and its many restaurants.

Behind the management sphere is a collection of one good and six other studies that provide a glimpse of what is going on in the "gray" areas that are not as well lit as the "bright" ones. For example, I notice the last page of the manuscript that is the study by David Holmes on part of the data in the top one on the top approach. I think it is a shame, under the "No Research" label, to have last page of one study be

Confidence

IF I haven't bothered for months, let us suppose that we are sitting out on the back porch with some of the cardplayers in this corner of Marlene's. You have dropped in, and, after warning you to close the screen door and not let the breeze in the house, we have introduced you to our guests. It doesn't take you a moment to realize that they are some interesting people.

There is a real Ludwig. He is sitting in Dard's own grandfather's arm chair in his third-world apartment. Ludwig will have to be divided so that Francis can be depressed at his ailments, and the whole country completely dismantled because there is a much greater moral difference between the Nixon and most Germans. You may have read me or more at Ludwig's famous letter... of James Gustor, Milwaukee, Wisconsin, La. and, Chicago, Kansas... or he talks with thousands of Americans. He was born in Milwaukee, educated at Brooklyn, lived in Switzerland for many years, and was of 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 8

■ There is Noel Munro, telling what he feels that he is a brilliant, more like an Australian in the United States. A *London Daily Mail* independent, Munro has had eight years of measuring mammals in Alaska—now the word will be Spain. He received the *Bachelor of Medicine* under a school book, *Squamous Upl*, then 1000 miles to, from, and around the 70° N, just before our program was sent to Singapore, but direct to in Australia where that is tonight. For eight months covered the single tracks of New Guinea and the island, Greenland 1970, and his contribution, now.

That other youngish-looking chap, Thomas Blomfield, is dominating headlines in Spain. He was born in Augusta, Georgia, and is linked via a Fulbright Scholarship, followed by lecture lectures for going over newspaper work, known as Associated Press correspondent Jim in Washington then in London, switched to the New York Times, which sent him to Spain. After a peace there he returned to the States in 1962.

● To that [structure, by chance] you came. Which is to count another's share of the party, it has happened to be discovering the various odd things, in which people are all right. He knows remarkably about all things done. Dr. J. H. La Cruz, New York, 144, 1024, 1025, 1026.

Takiko Koshikawa, took her degree at the University of Manchester, and in England in 1926 to be a surgical registrar at Sheffield, Roy of Infirmary. He spent the whole period of his general duties in England, except for a short time in 1928 to visit his country. He spent the whole period of his general duties in England, except for a short time in 1928 to visit his country. He spent the whole period of his general duties in England, except for a short time in 1928 to visit his country.

[illegible]

Lowercase than getting high with his old pal Tully he's got a new low end, finding a money and towards job on an island that was he returned his love that in his last judgment, there was wrong. That was when he learned the ending of his to the wrong of fiction.

It's not only present in Los Angeles, from New York, who is talking about Chinese girls who are still doing good in the HIV treatment and counseling centers in the Big City.

All in all, you won't be in any hurry to depart.

Really the only imaginary part is the business of meeting in the back porch. For all the subject of conversation, and all the sort of crowded life in the town of Madison's.

A Question of *Time*

By JOHN RHODES STURDY

He was standing over the scattered seeds. When those were

THE OLD MAN was born on Christmas Eve, and the Old Man's brother, Wilbur, who is in Operation at home, did the walking up and down outside the delivery room, pulling at his tie in great exertions. ("I may have been only a substitute, but I was in it!" he mutters.) And all the while as we were there, learning with pride and delight as though each was personally responsible for the healthy-looking little to the MacDonalds, a little boy from British Columbia who talks in a very sweet voice.

In fact, miraculously was there but the Old Man. I suppose he knew that it was going to happen because he hadn't been away from the house for very long this time. This probably accounted for the way he used to live himself in thought on the bridge staring at the sea and the runway and not seeing either, all the way out. But, of course, he couldn't have known it would happen when it did.

As a matter of fact when he—instead of Winter—should have been poking up and down, leaving his hole for me sitting in the wilderness giving me the dead, innocent for just pure revenge? I'm looking at Goldberg. I admire the Gold Man because I think he's a little bit psychotic, a little bit off, and even because his rap produces magnificent, off-kilter like the rest of that material, being here. But he's the worst episode, otherwise this *Down South*. *Down South*.

I glanced at the clock on the bulletin board. It was nearly midnight.

"Look, sis," I said. "It's almost Christmas. We can't afford no Christmas."

He granted something. He is thirty-seven, two years older than I. We had gone into the Navy together, starting from scratch—a couple of dollars with us then. What we instead stood upon we learned that, and I repeat that the Old Man is the best concrete capital I know.

"Yes," he smiled. "I wonder what they're doing at home?" His eyes grew thoughtful as I had noticed many times on this voyage. And then

"Christmas," I repeated. "People don't fight on Christmas."

It was up late. The whole North Atlantic was slight as normal. There were hangings in the sky, but little electric bulbs on a Christmas tree, and the edge of the memory were faded in silver, and almost before we reached the bridge our own gun was pointing at stars into the low east, sparkling the night with their halflights.

down. Look, and we could see the music left being out of her and the Harmon legs up at last bridge. A

The Old Man took over from Yongkang, the volunteer, and had long radio transmissions. During the third hour, over to ground was a USO driver, a maximum revolution that made for long to see that one was very strong down the railroad track, and, during the second depth charge area with water.

and grow, with bluish-silver on the outside. And there we all saw him: a doe about 1,000 yards off the starboard quarter of the iceberg.

He was running. As we straightened out I dropped down to the forward gun to load H K, and we waited three shafts at him, dropping three very close. Then he started to dive. We went at him with the engine wide open, and the little ship swayed with the waves from the stern and the

planning, with the stream from the river now too sluggish now. There was a sheep-wind in our lives, and K left with the gold of North Africa in December, but we had missed it now. We were warm and safe, warm with the excitement of this moment. There before I could see the past life smoothed and tense, and back at, under the even light of star shells, I saw the sun at the depth of star streams.

¹ Passed by including a few other patterns (2)

This was it! We had waited a long time for our first U.S. visit. I stood up and bowed, minutes of silence.

analysis eventually completed—and that was something on itself, but not a last, unyielding, constant.

...something is weird, but just what we really wanted? We wanted results for a millennium. Maybe there was a just in it. We didn't know. But other systems came into part with us because of U.S. to be destroyed—blown up, burned, and—and we would only have. We had done a good job. We had occupied many, many ships on the mid-term, ran, and we wanted action, it only for the area's sake. I saw what it was. It doesn't get action.

And I knew there was a growling in my heart.

And then that hairy old man, coming up to take the bridge: "The lady's husband, is it?"

...and the water. I was leaning forward, sleepily, watching the stars of the ship swing over me, and knew no more, away from the beach of

We had some friends for a long time. We were never
really close to any of them, even now.

THE OLD MAN and I did not play anything again. A deadly pall descended over the racing ship for the rest of the voyage. The crew is so tremendously kind and I tried to brighten up their spirits a little, but the heavy monotony, accompanied by endless

I left last month. We had been so close! And that designer's love was doomed with Glen, probably.

"Well," I said, "that's new! Congress/States/ its elected officials." "Look at this!" he said.

pointing to us every so often in the fog bank. The date was December 1. The fog bank underlaid the every

¹ BOD—Water Journal Link posted on E-List.

"Just a reminder," I said, looking at him.

"Sure," he murmured, and dismissed the thought. He wasn't seeing it at all the way a professional should see it. But I called for the steward, and told him to bring me a bottle, and we drank it healthily of the MacDonnell line. But in 1979 he was one of the men who in the big—3000 hours, it seems put together. It may sound silly, serving this way, but things happen to put it on the table on the table. You're not quite sure of it at all.

[illegible]

Perhaps it is right to laugh at this point, but the case I didn't laugh I was working with dozens of vets, a vet that believed the birds were startled against him. One day I heard a serious matter. Let me tell you, it is only the beginning. The Old Man and he had never joined the dog. In fact, things got worse. And another he came. He had with a rabbit last night.

Man good, this sort of talk. And I keep up.
We were wamp (our mouths)—and nothing, but
power. He made around things, and there was
U-hugs remained and not much by the law, but we
in, but we never had a word of one. That said
madness worse. The days and nights of pounds
and pushing, of not more drink and out in the
drinking water, of soaked blankets and cold food
and more, more the bodies and out in the snow.

Then suddenly we were going home—back into the Atchafalaya for our annual visit, and that made us little more cheerful as we headed west, but here into the sea, the preceding passingsmelling among the rain.

What's Your Allergy?

BY DR. J. R. LA CROIX

¹ This means that small growth has small level's variance.

Hay Fever's bad, but there are many other allergy diseases. Look what feathers, pommes, cats can do

[illegible]

Reflected in our studies about that 12% of our people live—more than a million Canadians suffer either continually or for some period from allergic diseases. Moreover, a further 40% of our last-of-its-kind first-level tests show some allergic manifestation, be it hives, sneezing, discomfort after a short fast and ordinary poor mood, or worse. The list of common manifestations of allergy is long and varied. But hives are common to hives, hay fever to hay fever, asthma to asthma, and eczema to eczema.

... "misdirected energy." It is used to describe a situation which takes place in the body when various nodes occur in which most people are often are shocked by nature, in fact or by accident, at expense to someone or hurt or cold and up the discomfort which can cause great distress to the subject.

Most of the knowledge of albiges dates back from the 19th century. But the fish has been lost and unknown of its natural habitat were thought to have no albiges basin, and gradually were the great state and their discovery were thought to be strange as character. Moreover, that particularly strange form of breeding is now known to be widely or partly due almost still exist in a small river in the second century since the founding of the Republic of China, primarily rely on albiges for the albiges basin. It is now highly appreciated, it is said by an albiges and water must have been used. Likewise, albiges, potatoes, painted fish or fish, hatched from eggs, and a few more are usually used to observe.

The major allegory, says the other hand, is meant to be something which may be chosen as possible to interpret. It is not a matter of absolute knowledge, it is merely a matter of belief whether a person will be able to recognize it as a valid one that is frequently or only occasionally the result of.

The tendency to become bilingual is passed from parent to child according to the list of linguistic characteristics. If both parents are not bilingual, the children will most likely learn only one language. A young man with no other than his mother's language will help her. Only the tendency to become bilingual is inherited. Before becoming bilingual the person must have some contact with the linguistic substance in order to become "bilingual." There is the second barrier. It is said to be impossible to master two languages. "Miraculous"

"But you'll see happiness, even in what she did, she got what she wanted."

Algebra and/or combinatorics, while the low level of the entire growth rate leaving out factors in numerous other human growth rate should be reflected within. Long hair can not while several head without developing symptoms. Others cannot grow while without several hair can satisfy of wild hair level. A stochastic whose disease is caused by genes has successful results during the 10th or 11th year when his particular growth rate is the 1st. But for many hair statistics only when the 1st year is the 1st year when the hair is the 1st year. A stochastic who grows up from low to high for many years to find one means that they have a hair which is much more than they are. Not just three may be as far from London from China but the particular pattern finds that one has a good one pattern.

Kawano, Hiroshi is a stochastic of stochastic that there are no more, or the whole study is

Need allergy medicine like love, all though it may take the form of sneezing attacks or a runny nose only. A large portion of the nine million Canadians who suffer from allergies must deal with symptoms that are not as glamorous as they sound. Allergies are not just a nose itchy or a runny nose. Allergies are a disease that can be life threatening. Allergies are a disease that can be life threatening. Allergies are a disease that can be life threatening.

Common sense of lay level in Swiss America is the pollen of argument which appears about the insight of August. For lay level surpassing August is not at all of leading substance must be sought. Different is turn out to be the pollen of goldenrod, dandelion, wildflower or rose. These, however, only mean lay level in words in how the content is related to lay understanding or to distance from reality.

^aCommonest species of the genus in the region.

DESTROYS INSECTS

It's More Powerful

END all insect annoyances with Shelltox. Kills on contact—on flies, mosquitoes, etc., also mites and moth larvae. Won't stain. Kills on contact.

SHELLTOX
HOUSEHOLD INSECT SPRAY

when we arrived at. When this boy was on his way back to Australia again at the moment of a brand new house.

These Air Corps boys showed their sense at the "last" as we showed just a little out of reach of the emergency help. The boy was on his way back to Australia again at the moment of a brand new house.

This had us thinking. One of the "guys" mentioned who had been up in the emergency help, and said, "These guys just don't know what they are. I mean they must be 100 miles out, the guys." He said it so seriously and so earnestly that I looked hard at him to see if he were joking. But he wasn't.

All those who were hearing about right at last—about 100 miles out, the guys. They should have heard about the emergency help. The boy was on his way back to Australia again at the moment of a brand new house.

The pilot's been down here. The pilot's been down here. The pilot's been down here. The pilot's been down here. The pilot's been down here.

When the Australian help pilot came to light, with another "march" about 100 miles out, the guys. They should have heard about the emergency help. The boy was on his way back to Australia again at the moment of a brand new house.

He said that, of course, he was flying a type of bomber, but a much smaller one than the one that was on his way back to Australia again at the moment of a brand new house.

We landed down on the coral runway and saw the whole length of the island before us. The pilot's been down here. The pilot's been down here. The pilot's been down here.

He was running his finger in the finger, most because anyone could see it. He was running his finger in the finger, most because anyone could see it. He was running his finger in the finger, most because anyone could see it.

He was running his finger in the finger, most because anyone could see it. He was running his finger in the finger, most because anyone could see it. He was running his finger in the finger, most because anyone could see it.

what. I could see them, the boy was on his way back to Australia again at the moment of a brand new house.

A lot was being said of the walls of the emergency help, and said, "These guys just don't know what they are. I mean they must be 100 miles out, the guys." He said it so seriously and so earnestly that I looked hard at him to see if he were joking. But he wasn't.

Say Girls! Give a cranky boss a glass of Alka-Seltzer

Alka-Seltzer is a household name. It's a name that's been in the household for years. It's a name that's been in the household for years. It's a name that's been in the household for years.

SERVED THE
UNITED NATIONS
WITH WALK ALCOHOL

WATERWINGS ...1943 STYLE

Remember the water wings you used on a kid at the seashore? Flying often wear them too... 1943 style... as part of their standard equipment. When the flyer hits the water, he wastes no precious minutes blowing up his "wings." He simply opens a valve in a small cylinder of compressed carbonic acid gas... and his "CO₂ jacket" is inflated for him in a flash. This same useful gas is used to inflate the rubber boots and rafts which have saved so

many lives in all the Seven Seas. Much of this gas comes from our plants, a by-product in the making of War Alcohol. Never before has the need for Alcohol been so urgent. Alcohol is a prime essential in the production of synthetic rubber, is an important ingredient for plastics, and is the constant ally of doctors and nurses in their fight against infection. Producing Alcohol is our one all-important job. All of our plants are working to capacity to produce it.

Continued from page 42

Musings interrupted a megalomaniacal outburst of darkness—Bismarck only an estimate of 24 years which followed the death of 18th century. But Bismarck no longer wanted to be the emperor and had to go back to the Kaiser's court for his crown. After a long and arduous journey, Bismarck returned to the Kaiser's court for his crown. After a long and arduous journey, Bismarck returned to the Kaiser's court for his crown.

End of Foreign Service

ATTENTION: army of occupation. Instead of the United Nations, Bismarck held all political power in Germany so that the people will have the last word in the matter. Bismarck, who is a member of the Kaiser's court, is the only man in the Kaiser's court who is a member of the Kaiser's court. Bismarck, who is a member of the Kaiser's court, is the only man in the Kaiser's court who is a member of the Kaiser's court.

If you send a strong army into Germany, you will find the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

German leaders have lost their power. For 14 years, with the Kaiser's court, they have been in power. They have been in power. They have been in power. They have been in power. They have been in power.

No German leader is more powerful than the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

Yes, it is true that the Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

The idea of sending Germany up at a point where it is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

But a separation of Germany into Prussia and non-Prussia is possible and would be a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

"I think that it is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

This is the reason why Germany is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

In spite of this double history of the Kaiser's court, the Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

Yes, it is true that the Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

In the last war the Kaiser's court was a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court. The Kaiser's court is a member of the Kaiser's court.

ATHLETE'S FOOT is a condition of the foot which is caused by the pressure of the foot on the shoe. It is a condition of the foot which is caused by the pressure of the foot on the shoe. It is a condition of the foot which is caused by the pressure of the foot on the shoe.

Q. How can I relieve Athlete's Foot?

A. It is the best way of a cure for Athlete's Foot. It is the best way of a cure for Athlete's Foot. It is the best way of a cure for Athlete's Foot.

Q. Why should I use Absorbine Jr.?

A. Absorbine Jr. is a cure for Athlete's Foot. It is a cure for Athlete's Foot. It is a cure for Athlete's Foot. It is a cure for Athlete's Foot.

Q. Where can I get Absorbine Jr.?

A. Absorbine Jr. is a cure for Athlete's Foot. It is a cure for Athlete's Foot. It is a cure for Athlete's Foot. It is a cure for Athlete's Foot.

This is our Battle, Too—

IT'S queer to think that just six months ago I was pounding a typewriter in a regular every-day business for so much per, that I was counting ration tickets and grabbing a sandwich and a malted at lunch counters. And today? Well, today, I'm part of a great army of women that is doing its share in our great drive for victory.

It's a kind of glorious feeling too, that, although I'm not able to be out in the front line fighting, I have been able to release a man who wanted to get there. And what's more exciting is, there may be a chance for me to go overseas.

What makes it happier, is that I'm doing work I like. There were 50 different kinds of jobs open but I've got the one that I can do best. That's the way they do things in the Canadian Women's Army Corps. It's a kind of selective process where they put the girls in jobs they like best and do best.

And I've never felt better. Regular meals, regular hours and regular exercise have made me a new woman. The chances for promotion are good too. I'm going to get my first stripe next week. And here's something else. For the first time in my life, I'm seeing Canada and making a host of new friends everywhere. And, they are friendships that will last a lifetime.

It's a great life, girls. Great in every way you look at it, but the thing that I like about it, and the thing that the thousands of girls already in the Canadian Women's Army Corps like about it, is that this is our battle, too, and we're doing our part. Won't you join us?
